INTERNATIONAL JOURNAL FOR NUMERICAL METHODS IN FLUIDS, VOL. 8, 1589–1590 (1988)

AUTHOR INDEX

Abdallah, S., 1029
Aitchison, J. M., 91
Alkire, R. C., 1513
Autret, A., 997

Bera, R. K., 759
Bernardi, C., 537
Blottner, F. G., 1331
Brebbia, C. A., 139

Cahouet, J., 869
Camareo, R., 1563
Carey, G. F., 933
Casulli, V., 1349
Chabard, J.-P., 869
Chang, J. L. C., 1241
Chang, K. S., 165
Chiang, H.-W. D., 913
Choquin, J. P., 1439
Connor, J. J., 813
Cuvelier, C., 351

Dagan, A., 943
Dawes, W. N., 1217
Dekeyser, I., 997
Demirdžić, I., 1037
Dick, E., 317
Donati, E., 199
Dreyer, J., 1029
Dupont, S., 283
Dutta, P., 723

Eiseman, P. R., 1165

Ferziger, J. H., 995
Fleeter, S., 913
Freitas, C. J., 769
Fujii, K., 1319

Gao, S., 1107
Garg, V. K., 579
Gary, J. M., 81
Gaskell, P. H., 617, 1203
Gavali, S., 1319
Glaister, P., 97, 1095
Glowinski, R., 1269
Glynn, D. R., 643
Golafshani, M., 897
Goodwill, I. M., 151
Grandotto, M., 997
Gronseth, R., 1543
Guj, G., 405
Gunzburger, M. D., 1229

Hafez, M., 1, 17, 31
Harb, J. N., 1513
Haught, A. F., 1523
Hearn, G. E., 199
Herbert, T., 1151
Hoffman, G. H., 1367
Holst, T. L., 1319
Hong, C.-N., 845
Hrymak, A. N., 123
Hung, S. C., 1403

INTERNATIONAL JOURNAL FOR NUMERICAL METHODS IN FLUIDS, VOL. 8, 1591–1592 (1988)

KEY WORD INDEX

Acoustic waves, 81
Adaptive grid computation, 475
Added damping, 519
Added force, 519
Added mass, 519
Advancing-front technique, 1135
Aeroelasticity, 913
Approximate Riemann solver, 97

Backward-facing step, 997
Bernoulli, 599
Blunt body problem, 1331
Boundary collocation method, 803
Boundary conditions, 1029
Boundary element method, 55, 327
Boundary elements, 91, 139, 199
Boundary-fitted co-ordinates, 387
Boundary integral method, 943
Boundary-layer flow, 1151
Boundary-layer singularity, 165
Boundary layer type analysis, 723
Boundary-type finite element method, 65, 559
Boundedness, 617
Boussinesq, 599
Broyden, 123
Buoyancy effect, 165

Cascade flow, 387
Cavitation flow, 943
Cavitation number, 943
CFD, 1543
Chemical kinetics, 1121
Chemical reaction, 55
Collocation, 537
Compressible viscous flows, 1195
Computational methods, 339
Connected channels, 705
Conservation equation, 957
Continuation, 81
Control points, 1165
Convective diffusion, 55
Convective transport, 617
Convergence analysis, 869
Convergence study, 123
Corrosion pits, 1513
Cryogenic oscillations, 81
Crystal growth, 283
Curvature, 617
Curve, 1165
Cut-off function, 1439

Deforming element, 1071
Developing flow, 1543
Diffraction, 199
Diffuser, 463
Discretization, 227
Dominant eigenvalue, 123
Double-delta wing, 1319
Duct flow, 845
Duct flows, 97
Duct, 463
Ducts, 705

Eddy viscosity, 1107
Electronic packaging, 1543
Ellipticity, 441
Embedding methods, 977
Euler equations, 97, 977, 1095, 1331
Eulerian–Lagrangian methods, 1349

FEM vs FDM, 845
FIDAP, 1491, 1523, 1543
Finite difference method, 369
Finite difference, 405, 617, 1203, 1403
Finite differences, 151, 1241, 1459
Finite element method, 247, 351, 493, 519, 965, 1011, 1469, 1543
Finite element methods, 1229
Finite element techniques, 1513
Finite element, 813, 1071, 1563
Finite elements, 123, 151, 283, 933, 957, 977, 1523
3D finite elements, 1491
Finite volume, 305, 1195
Flow-induced vibration, 913
Flow in turbomachinery, 1217
3D flow, 369
Fluid flow, 897, 1037, 1513
Fluid forces, 519
Fluid-structure interaction, 519
Fluid-structure interactions, 199
Flutter, 913
Flux splitting, 1195
Flux-vector splitting, 317
Free boundary flow, 351
Free shear flows, 1563
Free surface, 91, 897, 1011
Frontal advance theory, 1389

Galerkin finite element method, 997
Galerkin method, 965
Gallium arsenide, 283
Generalized co-ordinates, 1095
Glass process engineering, 1491
Gradient methods, 869
Green's function, 227
Grid, 1165
Grid generation, 181, 1135
Grid resolution, 1319

Half-plane, 743
Harbour oscillation C_0 non-conforming element, 65
Harmonic analysis, 813
Heat exchanger, 1523
Helmholz equation, 559
High convection, 1291
Higher order, 617
High-order, 1203
High Rayleigh number, 247
High Reynolds number flow, 475
Homotopy, 659
Hydrodynamics, 1071
Hydrodynamic stability, 81
Hyperbolic, 933
Hyperbolic equation, 957
Hyperbolic systems, 493

Incomplete Choleski conjugate gradients, 283
Incompressible, 1367
Incompressible flow, 759, 769, 1029, 1241
Incompressible fluids, 1469
Integral equations, 139
Interpolation, 1165
Inverse and direct methods, 1367
Inverse problem, 151
Inviscid flow, 759, 1029
Iterative, 813
Iterative algorithm, 897
Iterative solver, 283

Laminar and turbulent flows, 1469
Laminar boundary layer, 1367
Least squares, 813, 933, 957, 977
LES, 1107
Limiters, 1195
Local mode analysis, 441

Magnetohydrodynamics, 659
Melting, 1491
Method of characteristics, 965
MHD flow, 705, 743
Mild-slope equation, 65, 559
Mixed convection, 723
Mixed finite element methods, 869
Monotonic differencing, 1291
Moving boundary, 1071
Multigrid, 441, 671, 1203, 1217
Multigrid method, 417

Multiply connected domains, 1269

Natural convection, 139, 247, 283
Navier–Stokes, 463, 599, 671
Navier–Stokes and Euler equations, 1319
Navier–Stokes equations, 139, 351, 405, 1229, 1241, 1349, 1459
3D Navier–Stokes solver, 1217
Net, 1165
Newtonian and non-Newtonian fluids, 1011
Newton–Raphson, 123
Non-circular passage, 305
Non-Darcian flow, 151
Non-isentropic transonic flows, 31
Nonisothermal vertical surface, 723
Non-iterative finite difference method, 165
Non-linear, 933
Non-linear free surface, 1051
Non-Newtonian flow, 845
Non-Newtonian fluid interfaces, 1389
Non-staggered grid, 387
Non-uniqueness, 31
Nozzles, 1195
Numerical, 897
Numerical calculation, 1037
Numerical quadrature, 55
Numerical simulation, 1319
Numerical solutions, 1195
Numerical stability, 1107

Oil displacement mechanisms, 1389
Open boundary condition, 1051
Oscillation flow, 519

Particle approximation, 1439
Penalty function, 139
Penalty function approach, 965, 997
Perturbation technique, 723
Petrov–Galerkin, 1269
Petrov–Galerkin method, 493
Picard, 123
Pipelines, 339
Poisson equation, 1459
Porous media, 1389
Porous medium, 723
Potential equations, 1
Potentials, 599
Power law behaviour, 1389
Pressure correction, 417, 441, 671
Pressure equation, 1459
Pressure gradient splitting, 1331
Pressure Poisson equation, 1029
Pressure transients, 339
Primitive variables, 869
Propulsion, 913

Quasi-Newton, 659

Radiation, 199
Reconstruction, 1195
Re-entrant boundaries, 327
Relaxation methods, 1
Resolution of discontinuities, 1291
Riabouchinsky cavity flow, 91
Riemann solver, 1095
Riemann solvers, 1195
Rotating disk, 659

Secondary flows, 769
Separated flow region, 165
Shallow water, 1071
Shallow water equations, 813
SHARP simulation, 1291
Shear-thinning flow, 123
Shock waves, 1121
SIMPLE algorithm, 387
Simulation, 1051
Singular integrals, 943
Sondhauss tube, 81
Space conservation, 1037
Spatially periodic flows, 1403
Spatial marching, 1331
Spectral methods, 537
Spectral multi-domain method, 1121
Splines, 1367
Stability, 1151
Staggered grids, 537
Steady Navier–Stokes equations, 317
Steady streaming, 519
Stokes flow, 327
Stokes problem, 537
3D Stokes problem, 869
Stream function solutions, 31
Streamfunction–vorticity approximations, 1229
Strip theory, 199
Subsonic, 463
Subsonic flow, 1331
Surface tension, 1011

Taconis vibration, 81
Taylor–Görtler vortices, 769
Tensor, 1165
Thin shock layer, 1331
Third-order upwinding, 1291
Three-dimensional cavity flow, 769
Three-dimensional flow, 283, 1523
Three-dimensional transonic flows, 17
Three-dimensional unstructured grids, 1135
Tides, 813
Transfinite, 1165
Transient, 897
Transient flow, 283
Transition, 1151
Transonic flows, 1
Triangles, 181
Turbulence model, 1563
k-ε Turbulence model, 997
Turbulent, 463
Turbulent boundary layer flow, 493
Turbulent flow, 305, 965
Two-dimensional model, 339

Unsegregated, 1203
Unsteady aerodynamics, 913
Unsteady flow, 1403
Unsteady laminar boundary layer, 165
Unstructured, 181

Vectorization, 283
Vector potential, 17
Vector potential/vorticity vector, 369
Vector variants of relaxation schemes, 317
Velocity–vorticity approximations, 1229
Viscous, 463
Viscous compressible flow, 1121
Viscous flow, 351, 1439
Viscous incompressible flow, 519
Vortex breakdown, 1319
Vortex interaction, 1319
Vortex method, 1439
Vortex sheets, 759
Vortical flow, 1319
Vorticity, 599
Vorticity–stream function, 1269
Vorticity–velocity, 405

Wall law, 997
Wave diffraction–refraction, 65
Wave generator, 803
Wave–source distribution, 227
Wiggles eliminated, 1291
